Enhancement	Detail
Generate Notice to PBF Mom	This is used to generate the official notification for a mom who is partially breastfeeding and linked to an infant.
Authorized Representatives	M-SPIRIT will now sync the authorized representatives to all members of the household! This includes authorized representative data like marital status, education level and language. You can now add relationship as well.
Representative and Proxy History	This is a new button on the Additional Info 2 screen. It will tell you who was previously an authorized rep or proxy.
CGS, Growth Grids, Participant folder	The title bar of all of these windows will display the participants name, age, state WIC ID and household ID. The title bar of the Growth Grid Screen will now start with GG and the Participant Folder will begin with PF.
Applicant Prescreening	The sytem will allow (but not require) authorized representative information on the Applicant Prescreening screen.
Participant List	The Participant list was modified to allow the ability to search for participant records based on authorized representative information.
CGS	You must COMPLETE all required areas before you will see a check mark.
Passwords	All M-SPIRIT passwords must fit the following parameters: one uppercase letter, one lowercase letter, one number and be at least 8 characters. You will need to change your password every 60 days. If you have not changed your password in the last 60 days, you will be asked to change it when you log on and it must fit the new parameters. If you have changed your password in the last 60 days, you will be asked to do so at the 60 day mark. You cannot reuse your last password.
Time out	M-SPIRIT will time out after 30 minutes of inactivity and you will have to sign-in again to access it.
Sign in	You have 5 sign-on attempts before you will be locked out for 2 minutes. After two minutes, you can try again.

Bug	Detail
Mom/Infant Link	Mom is now in sync with infant's breastfeeding amounts. The system will not allow issuance of a breastfeeding package that does not sync with infant's breastfeeding status. It will also prompt you about certification dates based on breastfeeding. Risk factors should correctly assign based on breastfeeding amounts.
Issue Benefits	You can now issue formula benefits for an infant when the breastfeeding status changes prior the six month mark and 'benefits' have been issued.
VOC	Previously, when a breastfeeding mom with a VOC was certified, information on the pregnancy screen would populate. This has been fixed, and not pregnancy information will be populated.
Risk Factor 131	Once Risk Factor 133 has been assigned, it will not be removed with subsequent weights
Schedule Appointments	Only members of a househould that belong to the currently selected agency will show in the drop-down list (you will only be able to schedule appointments for members of a household that belong to your agency).
Risk Factor 121	If the child falls below a point that can be plotted on the grid, you will get a message that says, "The height/weight measurement falls below the lowest point on the grid. Is the value correct?" Risk factor 121 will still assign if the value is correct and saved.
Income Calculator	There was an issue with M-SPIRIT not retaining all income contacts. This has been fixed.
Residency	M-SPIRIT will now only allow residency proof to be copied between household members for exactly 60 days.
Pregnancy Information	The **Has Not Received Prenatal Care** checkbox is now enabled when a certification has been completed for a participant.
No Show Report	The criteria specified on the Generate No Show Report screen will now be correctly match the output.
Infant Information	There is now no default selection for **Ever Breastfed** on the Infant Information Screen when certifying a non-breastfeeding woman.
